

# GLASS — AIR

## Finishes

The **GammaStone Glass AIR** is an ultra lightweight panel of back-lacquered glass and can be easily mechanically installed. It also provides a high level of resistance against breakage by shock, far superior to traditional solutions with laminated glass. Available sizes up to 4200x1500 mm. **The float or tempered glass is applied depending on the size and required application.**

## Bicolor

GammaStone Bicolor AIR solution was born from the combination of different colorcolored glass applied on a single panel. The uniqueness is given by the infinite possibilities to realize large-format panels with glass finishes in different colorcolors and types.
